KIRAN KUMAR CHALLA

AI DEVELOPER · EDTECH & LMS SPECIALIST
Hyderabad, India | +91 9515569545 | kkchalla@outlook.com

Results-driven **AI Developer** building end-to-end AI products — voice agents, chatbots, adaptive LMS features, and investor-ready business decks. Combines Generative AI engineering with product thinking to deliver real impact. Proven international experience **opening new markets**, **training entire organizations** on newly launched AI products, and **presenting at C-suite and large-audience scale** across the Gulf region.

WORK EXPERIENCE

AI Developer & AI Development Head

January 2026 – Present

KAM Global for Digital & AI Media Solutions Pvt. Ltd. | Bengaluru, India

Formally appointed AI Developer for KAM International Group's Kuwait entity, KICCPA (Kuwait International Company for Computer Programming Activities) — extending this role across LMS, AI, and technology operations in Kuwait and the wider GCC region.

Kuwait International Expansion — AI Development Head

- **Opened an entirely new international market** — officially appointed AI Development Head for KAM Global's Gulf expansion; visited 45+ Kuwait schools in one month, presenting the full AI & LMS suite to founders, board members, directors, and R&D heads.
- **Turned field discovery into a live AI product** — ran on-ground needs assessments with school leadership, then independently designed and built a bespoke AI application solving those exact problems within a single field assignment.
- **Served as sole product authority and demo lead** — delivered end-to-end demonstrations across 45+ institutions covering AI capabilities, LMS workflows, product roadmap, and school management tools, acting as engineer, strategist, and brand ambassador at the C-suite level.
- **Led company-wide product training and large-audience launches** — trained every department on the AI/LMS suite so each team understood the product and its own role, and delivered auditorium-scale presentations of the full 25-module platform to drive org-wide adoption.
- **Designed and implemented a formal content workflow** for the AI Media Team's video/poster pipeline — tracker-based assignment plus a two-stage QC gate, including a dedicated GCC review layer — *cited in writing by leadership as bringing "much-needed clarity on ownership, progress tracking, and workflow management."*

AI-Powered School Products — Independently Designed & Built

5 fully AI-powered platforms built from school field visits — LMS-injectable and standalone-ready:

- **AI Academic Calendar & Substitution Platform** — automates scheduling, teacher substitutions & institutional calendar coordination.
- **AI Question Paper Management System** — intelligent paper generation, versioning & curriculum-aligned distribution.
- **AI Career Counselling Solution** — personalised AI guidance mapping student aptitude & skills to career paths.
- **AI Real-Time Safety Alert System** — live campus threat detection with instant multi-stakeholder alert routing.
- **AI Adaptive Mock Test Engine** — adaptive mock testing with real-time analytics & performance-driven question delivery.

Core AI Engineering & Product Responsibilities

- **Voice AI Agent:** architecting a real-time conversational AI student counsellor for EduAiTutors LMS — integrating STT, LLM reasoning, and TTS into one seamless voice pipeline.
- **AI Chatbot:** designed and deployed a production-ready chatbot for the company website — automating lead qualification, product queries, and user engagement, significantly reducing manual support.
- **LMS AI Features:** developing adaptive learning paths, AI mock test analytics, and real-time student performance dashboards within the EduAiTutors platform.
- **Internal AI Automation:** built custom GPTs, Gemini Gems, and Claude Projects — automating curriculum scripting and lesson generation, cutting content production time significantly.
- **Product Documentation:** authored the EduAiTutors User Manual (12 pages), platform walkthrough video, and AI-generated launch video — now the primary onboarding and sales demo assets.
- **Business Strategy & International Operations:** sole creator of investor pitch decks, service catalogues, and enterprise proposals for KAM Global and KICCPA LMS; support cloud-based deployments across Kuwait/GCC projects, ensuring compliance with data privacy, cybersecurity, and software quality standards.

CX Solutions Analyst

June 2025 – December 2025

Amazon Development Center | Hyderabad, India

- Managed end-to-end customer service operations via AC3 — resolving complex escalations through structured workflows and cross-functional collaboration.
- Maintained accurate documentation of customer interactions and resolution steps to support process improvement and audit requirements.

- **'Extra Mile' Award** — recognised for consistently exceeding performance benchmarks and delivering superior customer outcomes.

IT Solutions Engineer
April 2024 – June 2025

Tech Mahindra Infocity | Hyderabad, India

- Provided Level 2 enterprise IT support via ServiceNow — resolving MFA, Microsoft 365, and Outlook issues for large-scale user bases.
- Diagnosed and resolved hardware, software, and application issues — maintaining SLA compliance and high first-contact resolution rates.
- **'BRAVO' Award** — recognised for exceptional technical contribution and sustained client satisfaction.

Junior Software Developer (Part-Time)
October 2022 – July 2023

Datavid Limited | London, United Kingdom

- Developed and maintained backend services for a semantic data platform using modern web technologies.
- Designed and optimised CI/CD pipelines; monitored and configured Kubernetes clusters and cloud environments to ensure platform stability.

IT Technical Support Engineer
January 2021 – December 2021

Aganith Pvt. Ltd. | Hyderabad, India

- Delivered remote IT support to international clients — troubleshooting hardware, software, and network issues with high resolution efficiency.

AI PROJECT EXPERIENCE

Founder & AI Product Developer
2025 – Present

Preparation AI | Self-Founded EdTech AI Product

- **Founded and independently built Preparation AI**, an AI-native mock exam engine that evaluates student performance in real time and generates accurate, topic-level performance analytics.
- **Engineered a proprietary recommendation layer** that identifies exactly where a student is underperforming and automatically surfaces targeted YouTube resources to close that specific gap — turning a test result into a clear next action.
- **Owned the product end-to-end** — concept, AI architecture, and working prototype — as a self-funded founder project built on a modular foundation designed to grow well beyond its current release.

Founder & AI Content Developer
2025 – Present

Tutor Amma.AI | Self-Initiated EdTech AI Project

- Designed and produced AI-powered tutor videos for B.Com and CBSE students — using ChatGPT, Gemini, and NotebookLM for structured lesson scripting and syllabus-aligned content generation.
- Built realistic AI avatar-led lessons using Synthesia and HeyGen with natural student-friendly voiceovers via ElevenLabs; edited and assembled final productions in Adobe Premiere Pro.
- Delivered end-to-end AI content workflow — prompt design, script generation, and video production — for a pre-release scalable AI tutoring platform.

CORE SKILLS

Generative AI	ChatGPT · Claude · Google Gemini · Prompt Engineering · LLM Pipelines · Custom GPTs
Voice & Chat AI	Real-Time Voice Agents · STT / TTS · Chatbot Development · Conversational AI
AI Products Built	Academic Calendar · Question Paper System · Career Counselling · Safety Alerts · Mock Engine
EdTech & LMS	LMS Development · Adaptive Learning · AI Mock Tests · Student Analytics · EduAiTutors
AI Video	Synthesia · HeyGen · ElevenLabs · Adobe Premiere Pro · NotebookLM
Business & Product	Investor Decks · Service Catalogues · Technical Documentation · B2B Proposals · C-Suite Demos
Training & Enablement	Cross-Departmental Product Training · Workflow & QC Process Design · Stakeholder Alignment · Founder: Preparation AI & Tutor Amma.AI
Cloud & Dev	AWS · ServiceNow · CI/CD · Kubernetes · Backend Development · Cloud Deployments & Compliance

EDUCATION & ACHIEVEMENTS

Bachelor of Information Technology Engineering
SRM University (Main Campus), Chennai, India · 2016 – 2020

'Extra Mile' Award — Amazon, 2025
'BRAVO' Award — Tech Mahindra, 2024
